Information Security Starts Here

Detroit • Chicago • Denver • San Francisco
Dallas • Washington DC • New York • Seattle

As your trusted partner,

Netrex can help you secure your Internet connection, protect your information assets and shield you from intrusions and network misuse with our ePatrol family of managed security services. We cover you with:

- Firewall Management Services
- Virtual Private Networking (VPN) Services
- Secure Remote Access Services
- Intrusion Detection, Monitoring and Response Services
- Anti-Virus/Anti-Vandal Management and Protection
- Web Site Blocking Management and Protection

What's the benefit? It's simple.

You can integrate ironclad security solutions with your existing Internet connectivity infrastructure to address a full spectrum of Internet security issues.

ePatrol is turn-key, ISP-independent. And, Netrex protects you with complete service delivery including:

- round-the-clock helpdesk
- expert security monitoring, escalation and response
- hardware and software selection and installation
- security policy development and ongoing management
- security education services
- other security consulting services

Are you covered? To learn more about how to secure your dedicated Internet connection, visit www.netrex.com/areyoucovered?

About ePatrol™ Enterprise Security Management. An integrated framework of round-the-clock managed security services, ePatrol provides support and management for firewalls; Virtual Private Networks (VPNs); strong user authentication; traffic and bandwidth allocation; directory-enabled networks; anti-virus and anti-vandal scanning; Web content filtering; and attack recognition and response. These services include hardware, software and 24x7 technical support. ePatrol is OPSEC-compliant, meeting the requirements outlined in Check Point's Open Platform for Secure Enterprise Connectivity (OPSEC) Alliance. It also meets the standards set forth in ISS' Adaptive Network Security Alliance (ANSA).
